

“NEW” Product Essentials Washable Face Mask

AlSCO has a new addition to the Product Essentials range, it's the AlSCO washable and re-usable face mask and it's available for direct sale. The mask will be ideal for businesses in their restart phase or even those who have continued to work through.

The mask creates a 3 layer woven barrier between the wearer and the outside environment to help minimise large particle droplets. It's PolyCotton with a 100% Polyester filter, has replaceable elastic ear loops, is available in black or white and one size fits all.
